Missouri Weekly Hay Summary

Cooler temperatures this past week have most producers thinking that fall is definitely here, and winter is just around the corner. With rain over most of the state this past week most all harvest has come to a standstill. Supplemental feeding of hay is in full swing, as the heavy frosts this past week have stopped all forage growth. Many hay producers receiving phone calls on the supply of hay, resulting in few sales, as most are only checking prices. Hay supply moderate to light, demand moderate to good. Prices steady. The Missouri Department of Agriculture has a hay hotline available for buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY(4429).(All prices per ton unless specified) Supreme quality Alfalfa (RFV>185) 135.00-160.00 premium quality Alfalfa(RFV170-180) 100.00-125.00 Fair to Good quality Alfalfa(RFV130-170) Round bales 40.00-80.00 Small, Big squares 70.00-110.00 Good quality mixed Alfalfa and grass small square bales 3.00-4.50 per bale, 30.00-60.00 per large round bale Good to Premium quality Prairie hay small squares 80.00-100.00, Fair to good quality Prairie hay 40.00-70.00, Premium Quality Brome large Squares 90.00-100.00 Good quality Brome 40.00-70.00 Fair quality Brome and mixed with grass round bales 15.00-35.00. Good quality Timothy Hay 3.00-4.50 per small square bale, Good quality Mixed Grass hay 25.00-45.00 per round bale Fair quality large round bales Fescue 15.00-30.00 per bale Wheat hay 50.00-70.00 Wheat straw 1.75-3.00 per small bale. Corn stalks 20.00 per large round bale.

Weekly Crop Report

Rainfall during the week allowed only 3.5 **days suitable for fieldwork** and hampered row crop harvesting, although the moisture proved beneficial to winter wheat stands. **Topsoil moisture** supply showed improvement in all districts, rated statewide at 23 percent very short, 24 percent short, 48 percent adequate, and 5 percent surplus. Despite the improvement, the west-central, central, east-central, and southwest districts remain mostly short to very short in topsoil moisture, with the west-central and southwest about 90 percent short to very short. Subsoil moisture and hay supplies are concerns across much of the State heading into winter. **Field Crops Report** The **corn** harvest is 89 percent complete, showing progress of only 1 point over last week, although it is still 2 days ahead of last year and nearly 1 week ahead of normal. The northwest district is 68 percent harvested, the north-central 87, and the northeast 92, with all other districts almost completely finished. The **soybean** crop is 93 percent mature with 64 percent harvested, slightly behind last year but 4 days ahead of the usual harvest pace of 57 percent complete. Harvest is most advanced at 72 to 73 percent done in the central, northeast, and east-central districts, while the three southern districts are all lagging last year's progress. Seventy-seven percent of the **sorghum** crop has been harvested, 3 days behind last year but 3 days ahead of normal. **Cotton** harvest, at 49 percent complete, is 10 days behind last year and 6 days behind the 5-year average. Condition of the crop is reported as 1 percent very poor, 8 percent poor, 25 percent fair, 63 percent good, and 3 percent excellent. **Winter wheat** seeding is 61 percent complete, 2 days behind last year but 3 days ahead of average. Wheat emergence of 31 percent is slightly behind last year and the 5-year average. Condition of the crop is rated 6 percent poor, 47 percent fair, 46 percent good, and 1 percent excellent. **Pasture & Livestock Pasture** condition rates 36 percent very poor, 21 percent poor, 26 percent fair, 15 percent good, and 2 percent excellent. Rainfall during the week helped improve general pasture condition, but was too late in most areas to help cool season grass growth. Many cattle producers in central and southern areas are requesting drought assistance while being forced to trim herd numbers due to lack of stock water and hay supplies.
